

St. Vivian Preschool Program

Welcome!

Here in our Preschool program, we are proud to welcome children ages 3-5. We offer various part-time and full-time schooling, and build our lessons and activities around the student's academic, social, and emotional needs.

Every day in Preschool, your child will work either one-on-one with the teacher, or in a small group that is focused around your child's academic needs. These small groups focus on the foundation of a thorough education – basic reading skills such as letter identification, letter sound identification, reading sight words, and math skills such as number identification, patterning, measurement, and more. Through a series of assessments, we will place your child in an appropriate small group.

Social skills are an important part of our Preschool program here at St. Vivian. Children at this age enjoy meeting new friends and form a bond with their classmates. Your child will learn how to interact with others in an appropriate manner, while learning the virtues of patience, kindness, generosity, etc.

Please contact the office at 513-522-6858 if you are interested in enrolling your child here at St. Vivian. We look forward to hearing from you!
